

MERCK

# set your sights on cytokines

More cytokines means even more discoveries in biology and beyond

Multiplexing with MILLIPLEX® Human Cytokine Panels A and B offers you:

- The ability to analyze nearly 100 cytokines in 50 µL of sample, such as serum, plasma or tissue lysate.
- The flexibility to choose any combination of analytes from each panel of 48 cytokines to design a custom kit that better meets your scientific needs and budget.
- Superior performance with rigorous assay development and quality control testing.
- A convenient “all-in-one” box format that gives you the assurance that you will have all the necessary reagents you need to run your assay on any xMAP® Luminex® platform.
